

GAIUS EMMANUEL

Frontend Developer

+234 813 729 7521 | gaiusemanuel12@gmail.com | Lugbe, FCT Abuja

Portfolio: <https://bapyat-dev.vercel.app/>

PROFESSIONAL SUMMARY

Frontend Developer specializing in React, Next.js, and TypeScript, focused on building responsive, high-performance web applications. Experienced in developing real-world projects using REST APIs, modern UI patterns, and scalable component architecture. Strong emphasis on performance, accessibility, and clean user experience. Currently expanding into fullstack development with Node.js and Express.

KEY HIGHLIGHTS

- Built and deployed 3+ production-ready web applications using React and Next.js
 - Strong focus on responsive design, performance optimization, and user experience
 - Experience consuming REST APIs and managing application state effectively
 - Comfortable with modern frontend workflows including Git, npm, and component-based architecture
-

TECHNICAL SKILLS

Languages & Frameworks: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js

Styling & Design: TailwindCSS, Responsive Design, Mobile-First Development

Tools & Workflow: Git, GitHub, VS Code, npm, Browser DevTools

Libraries & APIs: GSAP, REST APIs, React Router, Formspree

Backend (Learning): Node.js, Express, MongoDB (Mongoose)

PROJECTS

DevLog — Fullstack Journaling App

Live: <https://devlog-drab-psi.vercel.app/>

Code: <https://github.com/Ayungcodes/devlog-fullstack>

Stack: React, Node.js, Express, TailwindCSS

- Built a fullstack journaling application with a RESTful API for seamless client-server communication

- Developed a responsive, mobile-first UI using TailwindCSS
 - Implemented dynamic state management using React hooks (useContext, useEffect, useMemo)
 - Enhanced user experience with GSAP-powered animations
-

Luxury Watch Site — E-commerce Frontend

Live: <https://luxury-watch-shop-neon.vercel.app/>

Code: <https://github.com/Ayungcodes/luxury-watch-shop>

Stack: React, TailwindCSS, REST API

- Built a dynamic storefront by consuming a REST API for product data and filtering
 - Developed reusable and modular React components for scalability
 - Implemented a persistent client-side cart with real-time updates
 - Created a seamless multi-page responsive experience using React Router
-

Freelancers Dashboard — Task & Client Management App

Live: <https://freelancer-dashboard-alpha.vercel.app/>

Code: <https://github.com/Ayungcodes/freelancer-dashboard>

Stack: React, TailwindCSS

- Built a dashboard interface for managing clients and project tasks
 - Integrated Recharts for data visualization and performance tracking
 - Developed reusable UI components including tables, KPI cards, and modals
 - Implemented local storage for session persistence
 - Designed multi-step workflows using conditional rendering
-

WORK EXPERIENCE

Field Supervisor — Alphabet Multimedia (2022 — 2023)

- Coordinated workflow between design and production teams to ensure timely delivery
- Performed quality assurance checks and resolved technical issues
- Managed cross-functional communication in a fast-paced environment

Transcriptionist — Rev (2019 — 2020)

- Delivered high-accuracy transcriptions across diverse subject areas
 - Managed multiple concurrent projects under tight deadlines
 - Developed strong attention to detail and precision
-

EDUCATION

IJMB Advanced Level Program — ABU Zaria
Ave Maria University, Nasarawa (2023 — 2024)
Relevant Coursework: Mathematics, Physics, Chemistry

CERTIFICATIONS & LEARNING

- Responsive Web Design — freeCodeCamp
 - Continuous learning via Scrimba, freeCodeCamp, and official documentation
-

ADDITIONAL INFORMATION

Languages: English (Fluent)
Open to: Remote, Internship, and On-site roles (Abuja)
Interests: Performance Optimization, Accessibility, Fullstack Development
